These decisions modified the initial Decisions of ANRCETI regarding the imposition of special preventive obligations in relation to its significant power on the voice call termination market in the individual mobile telephone network. The aggregated texts of the decisions can be consulted at the following links:

By these 3 decisions (from the April 2023) all Moldavian mobile operators were designated (confirmed) as operators with a significant power on the market for voice call termination in their own mobile telephony network, while the ex-ante obligations to offer the termination service, cost orientation of tariffs were adjusted in order that European calls fall under the tariff cost orientation obligation. Thus, moldovan operators have to provide termination services of calls originated at European numbers (EU and EEA) at rates that do not exceed rates indicated in the Delegated Regulation no. 654/2021.
