Recommendation on Relevant Markets
MAIN QUESTIONS RAISED IN THE PUBLIC CONSULTATION

- Deletion of Termination Markets (M1 & M2) in relation to the euro-rate implementing acts.
- Potential merging of M3a (WLA) and M3b (WCA) into one market
- Potential deregulation of M3a (WLA), M3b (WCA) and/or M4
- Case for a new market on Physical Infrastructure Access (PIA)
• M1&M 2: To the extent that the Commission provides sufficient guidance on how NRAs could address other remedies than prices (access, transparency, and non-discrimination, ancillary services ...), BEREC would not be against removal of Markets 1 and 2 from the list.

• M3a, M3b, M4: still to be in the list (high and non-transitory barriers)

• Merging M3a and M3b: As a starting point for NRAs analyses, WLA and WCA should be assessed as separate markets. BEREC would welcome guidance on which factors might be useful to consider for the purposes of determining whether there is a case for defining a broader wholesale market in the explanatory explanatory note.

• Access to physical infrastructure: Not appropriate to include a new wholesale market for access to physical infrastructure, as this would oblige all NRAs to undertake an analysis that would in many cases offer little if any material benefit. However given trends in some MSs, recommendation to address in the Explanatory note the potential for a definition of a separate market for physical physical infrastructure.
BEREC Input on the functioning of the roaming Regulation
RLAH clear success

- High compliance
- No significant impact on domestic and RoW prices
- Derogation applications decreasing
- Significant increase of volumes
- Average wholesale rates well below price caps
Some issues for further consideration

- **QoS & Roaming**
  - Cases of limitations to 3G access for roaming
  - Low transparency

- **Misuse and fraud**
  - Increase due to RLAH

- **5G**
  - New regulatory approaches because of eg network slicing

- **MVNOs**
  - RLAH to a certain extent negatively impacted MVNOs
Proposals to EC for consideration during review process

- Specific obligations for QoS in Regulation
- Specific Measures for MVNOs
- Subscribers registration for pre-paid tariffs
- Regulated termination rates for all numbering resources
- European database with VAS/premium number ranges
- Transparency measures for VAS to protect consumers
- More clarity about IoT/M2M
- Close monitoring of technological developments
